

Seminar

Data Governance in the Real World

Gain confidence and clarity in your data. This seminar aims to provide you with the confidence to introduce and manage your data governance programme with step by step practical solutions for all types and sizes of organisations. Learn:

- how to prioritise what's really important and will bring you real return on investment
- how to convince senior management this is the foundation your organisation needs to deliver quality services or products
- who needs to be involved
- what's essential to improve your maturity around data governance that's feasible on any budget with available resources
- how data governance enables agencies to be confident in the use of personal information (for analytics) in an age where privacy is increasingly in the public consciousness.

Wednesday 4th April, 9 am – 12.30 pm Level 12, 89 The Terrace, Wellington
